

24hr emergency environmental and disaster response

OAMPS Petrochemical Insurance and Risk Management

Handling and transporting fuel or other hazardous goods can be a dangerous business. Good planning and rigorous safeguards will lessen the risk but if the unexpected happens, you could be left with a full blown disaster on your hands.

That's when it pays to be protected by OAMPS Petrochemical

Comprehensive protection, complete peace of mind
Our insurance plans have been specially designed to offer protection and peace of mind to our clients. We have handled over 75,000 claims in our time and we doubt you will be involved in a scenario that we have not encountered.

“ When a sub contractor caused a major fire at our depot, OAMPS were on site within hours managing the incident and liaising with the relevant emergency services on our behalf. We had never used the emergency response provided by OAMPS before and we are pleased in our hour of need it lived up to our expectations”

Robert Oakley, Eco Oils.

OAMPS Petrochemical

“Protection and peace of mind”

At OAMPS we invest heavily in training so you will be able to talk to industry trained staff. All of our major incidents are reviewed and used as training materials to constantly improve the quality of the service provided by OAMPS Petrochemical.

24/7 emergency environmental response

As an OAMPS Petrochemical client you receive access to our 24hr environmental emergency response facility operated by OHES Environmental our sister company. Their environmental consultants and clean up specialists will take instant control of the situation, acting rapidly and effectively during the vital first few hours to minimise the effects of the incident.

Knowing help is always at hand is crucial. If you suffer a major incident out of office hours when brokers or insurers are not contactable, your response will be significantly delayed. A fast response is vital, not only for containing the situation and avoiding EA fines; a late or poor response can boost claim costs and see your insurance premium spiral. Which is why OAMPS Petrochemical utilise the services of the National Chemical Emergency Centre in conjunction with OHES Environmental to make sure we are contactable 24/7 what ever the circumstances.

24/7 disaster response

Not all emergencies situations occur away from your premises. Should you be unfortunate enough to suffer a major loss at one of your sites and you insure your property through OAMPS Petrochemical then you will access to our Business Disaster Recovery Service which within 48 hours will provide you with:

- Emergency alternative accommodation in any one of 450 office locations in mainland UK, complete with office furniture, meeting rooms, reception facilities, fax/copier and secretarial services.
- An event manager who will arrange and oversee the service delivery on site
- A PC network of up to 6 workstations
- Connectivity with internet and e-mail
- Reinstatement of your essential contact data
- Redirection of telephones

Meeting your legal obligations

The HSE expects every business in your sector to have a Disaster Recovery Plan as part of your COSHH risk assessment. If you suffer a major incident and you don't have such a plan, then you could be heavily fined. The services offered by OAMPS Petrochemical assist with meeting this legal obligation.

Peace of mind at your fingertips

If you'd like to discuss in more detail how OAMPS Petrochemical can bring you peace of mind, please email us at info@oamps.co.uk or call us today on **01372 467 266**.

“Hopefully never needed but always here to protect you, your business and the environment”

Disaster Recover Plan in action

When a fully laden 38 ton Artic was forced off the road by a careless driver, the consequences could have been disastrous. The tanker overturned and all its compartments were ruptured, spilling 33,000 litres of oil across a main road and on to open countryside.

The OAMPS emergency environmental response saw specialist contractors in situ within one hour. They took full control of the incident and all necessary steps to contain and clean up the spillage. The Department of the Environment and the Environment Agency later inspected the site and gave the recovery operation their blessing. Thanks to the OAMPS emergency environmental response, the oil distributor actually enhanced its reputation with the government agencies, who held the plan up as an example to all.

“All responsible oil distributors should have a 24hr Disaster Recovery Plan like this in place.”

Susan Hancock, CEO, Federation of Petroleum Suppliers
